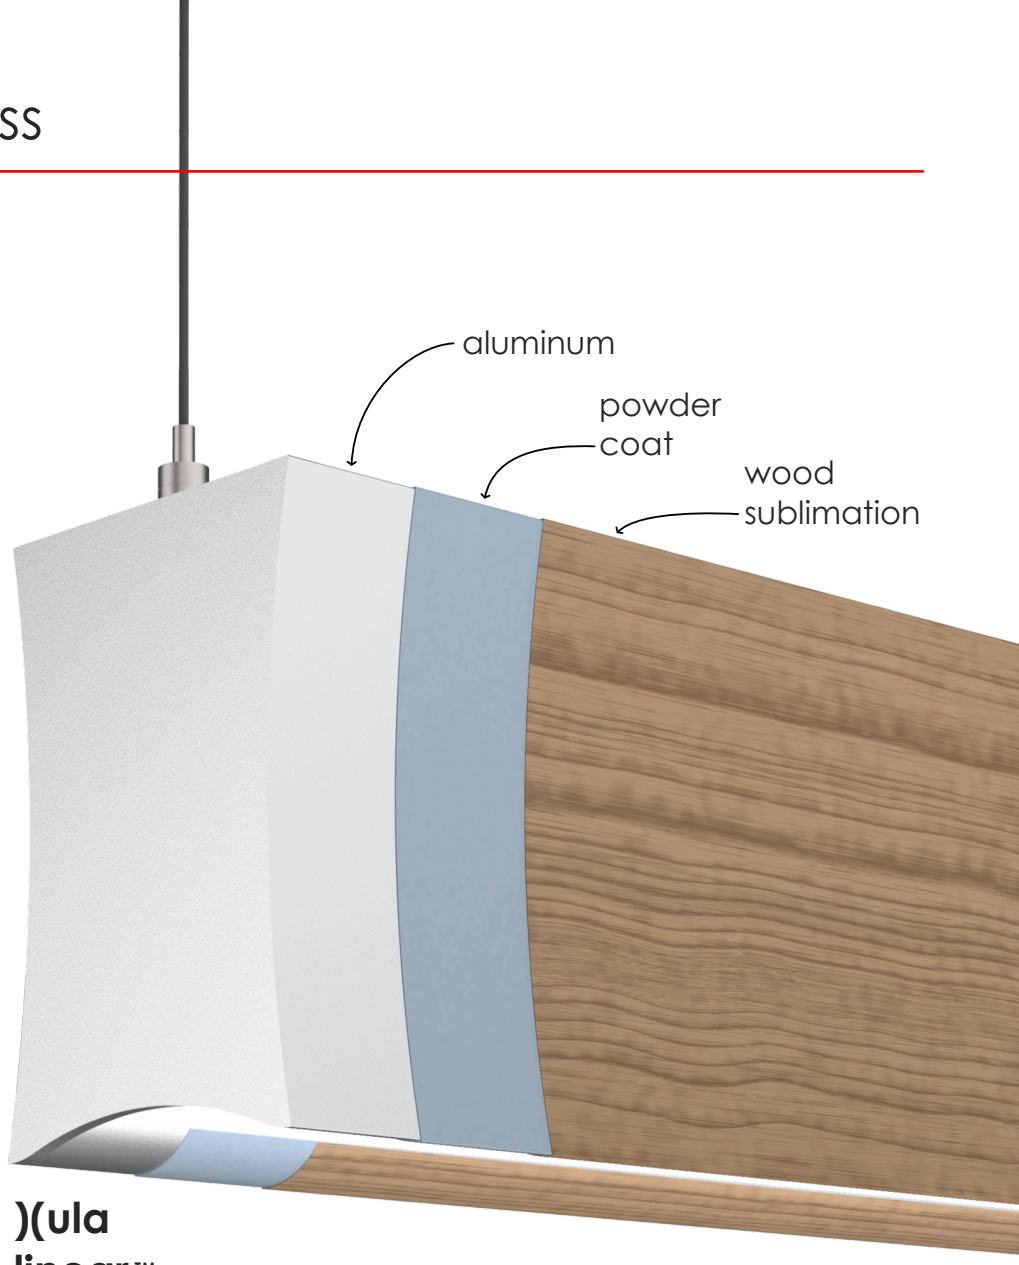
sublimation process

ASH ashwood

ENG english brown oak

ESP espresso



)(ula linear™
(P72xx)

Utilizing an advanced sublimation process, our luminaires can take on the character and warmth of one of three new standard wood finishes.

The housing is first powder coated. Then, a film of the finish is cut and custom-fit around it. During the curing cycle, the inks from the film transfer to the powder coat.

After the transfer film is removed, the wood finish remains.

The **)(ula.linear™** (pronounced hula) fixture is seen above in **english brown oak.**

rings and **rounds**

wāf.r.3™ (P56xx)

2πr™ (P23xx)

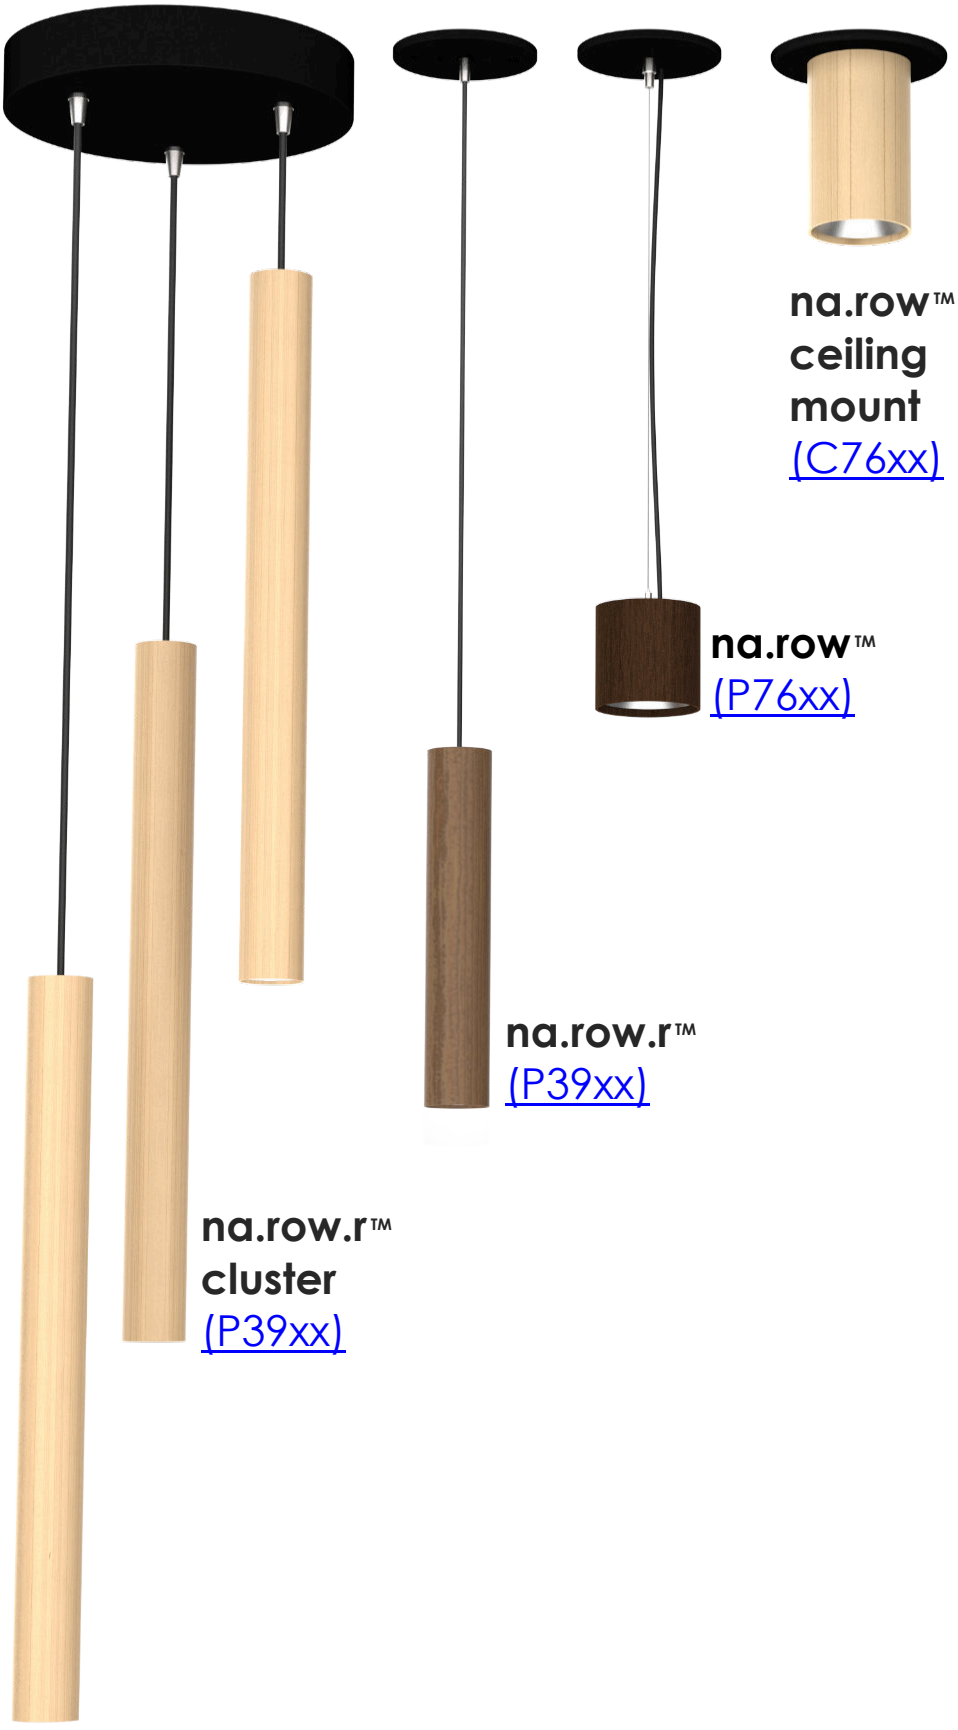
z.rō™ (P57xx)

Enhanced with the natural beauty of 3 new wood finishes, the **wāf.r.3™**, **2πr™**, and **z.rō™** create striking focal points in any space.

With our luminaires you can design inviting spaces lit with exceptional 90+ CRI color accuracy.

Multiple color temps. and lumen packages provide flexibility for any project.

cylinders



na.row™ ceiling mount (C76xx)

na.row™ (P76xx)

na.row.r™ (P39xx)

na.row.r™ cluster (P39xx)

Available in a wide range of styles and sizes, the **na.row™** and **na.row.r™** provide opportunities for creating distinctive designs.

These pendants suit a variety of environments including hospitality and healthcare. The new wood finishes elevate a space while retaining durability and cleanliness.

squares

With a variety of mounting options, the **sq.too**™ and **sq.3**™ complement a wide range of applications.

They deliver a refined visual presence through a modern square profile and make an inviting addition to any room in **ashwood**, **english brown oak**, or **espresso**.

sq.3™ **ceiling mount** (C66xx)

sq.3™ (P66xx)

sq.too™ (P40xx)

sq.too™ **cluster** (P40xx)
